

ARCHITECT
JØRGEN RASMUSSEN
(1931)

Jørgen Rasmussen was born in Odense on April 26, 1931. He graduated from the Royal Danish Academy of Fine Arts in 1955 and in 1957, Jørgen and his twin brother, Ib, started their own studio with a focus on single-family houses.

In 1958, Jørgen Rasmussen and his brother began working for KEVI A/S. The twins designed a villa for KEVI's CEO, Bent Harlang, after which they were asked to design the chairs for the villa.

KEVI

KEVI is a classic office chair designed in 1958, and has sold in more than 2.5 million originals worldwide. The double-wheel caster is invented for KEVI, but today you'll find it under everything from chairs to suitcases. Today, both KEVI and the KEVI casters are acclaimed design objects.

There is nothing superfluous: seat, back, base, and controls designed to functional perfection.

Designed by an architect, it is suitable for homes, offices, schools and workplaces where one solution must satisfy many demands.

PRODUCT INFO

KEVI 2537
